It results in an irrevocable depletion of a person's energies and emotional resources with various negative consequences for individuals and organizations. In the past 30 years researchers tried to understand the burnout construct in its complexity and offered diverse answers to questions of why burnout appears and how it can be measured. But despite the broad academic research on burnout, the knowledge base is still lacking a comprehensive approach on how to prevent burnout from happening and how to alleviate organizations from its the negative implications. This thesis gives insights by integrating various research findings with tangible management techniques. A theoretical model is constructed for offsetting burnout and its consequences. A list of 12 multidirectional propositions is given that managers may apply to proactively decrease burnout and...
