Great opportunities have to be weighted against investments into knowledge, technology, and organizational restructuring. Often, great uncertainty is involved because of rapidly changing technologies and mutual dependence of transaction parties on each other's degree of technology adoption. The main advantage of electronically performed activities is its improved efficiency. In the past, business-to-business applications have been based on specific investments of individual firms that attempted to gain competitive advantages from proprietary electronic data interchange (EDI). However, investments were huge and flexibility was very limited. Nowadays, Internet technologies allow for global reach, ubiquity, and improved efficiency at reduced asset specificity. One business application of Internet technologies is the independent business-to-business Internet-
