S39 2009a OCLC Number: (OCoLC)430828635 Subject: Electronic waste -- United States -- Management. Excerpt: . . . 11 consumed 150 kilowatts of power. We have obviously come a long way since February 14, 1946. As electronic products have become faster and more reliable, they have also become significantly smaller and more disposable. Blackberry devices, iPods, cell phones and other small electronics are rapidly replaced by newer models with more gadgets. Computers and laptops provide a level of computational ability that is hardly used by most people, yet still highly sought after in the marketplace. Advances in flat-screen technologies have led to a new generation of televisions. With each new technological advance and model replacement, we face an inevitable problem of electronic waste, or e-waste. There are many aspects of the e-waste dilemma: the definition of e-waste; reuse and recycling of electronics; landfill disposal and hazardous waste; regulatory issues and export economies. The EPA has already instituted several programs to deal with these problems. They include: EPA's Product Stewardship which supports stakeholder dialogues,...
